CyberLock Delivers Route Accountability and Key Control

Electronic Locks and Keys that Report Who, What, Where, and When!

CORVALLIS, OREGON, March 13, 2009—**CyberLock**, manufactured by Videx, provides route accountability and key control by auditing vending machine entries and restricting each driver's access to specific machines during certain times of the day. The audit report allows management to investigate incidents and head off potential revenue shrinkage problems. When the protection of cash is the primary consideration, it is this audit reporting that makes CyberLock so powerful.

CyberLock makes it easy to convert vending machine locks into a full-functioning access control system. Simply replace the core in each machine's lock with a CyberLock electronic cylinder. CyberLock provides a detailed record of machine entries and unauthorized attempts to enter from the audit trail in the locks and keys. Also, each route driver's key can be set to expire at a certain time each day to prevent access after work hours and on weekends. If a key is lost, it can be quickly deactivated. The electronic keys cannot be copied and the CyberLock cylinders have no keyway to pick.

Videx offers a suite of three *CyberAudit-Web* software products for managing the CyberLock system: ***Lite***, for small vending companies, easily accommodates installations of up to 50 electronic locks and 50 programmable keys; ***Web Professional***, for mid-size operations, capably supports installations of up to 500 electronic locks and 500 programmable keys; ***Enterprise***, the elite member of the software suite, offers the features typically required by large installations including the ability to delegate the administration of the locks and keys to different departments or regions. With targeted installations of up to 15,000 electronic locks and 15,000 programmable keys, Enterprise is packaged on an application server with all the components needed to meet the most demanding requirements.

For more information about CyberLock products, please contact Videx by phone at 541-738-5500, by fax at 541-738-5501, by email at sales@videx.com, or visit our web site at www.videx.com.
